“Let the Matrimandir be the living symbol of Auroville’s aspiration for the Divine”

This day, 28th Feb is Auroville’s 53rd anniversary since its inauguration in 1968.

When I signed up for the Savitri Painting course, it was a leap of faith and largely because of a sense of trust I had in the space that would be created by the facilitators. I was someone who had a connection to the works of the Mother and Sri Aurobindo always indirectly — through Swadharma and painting was something I had disconnected from since childhood. But there was an inner knowing that this was the way to go. Little did I know about the nature of transformation that was going to take place.

Surya, an alumni from batch 8 of Swadharma, shares his journey through the Savitri Painting course and the transformations that it triggered within. Savitri Painting is a powerful tool that combines painting, poetry and music to help one touch their deepest essence. Read the full blog post here.

On 30th January we had a one of a kind Swadharma sharing circle with alumni cutting across many different batches joined by some of our dear facilitators. Sheetal anchored the sharing circle as he invited all of us to share our reflections and growth over the past year, a year that was that forced many of us to go deeper within. Even the usual Swadharma dogs somehow got word of the circle and couldn't afford to miss it.

It was incredibly enriching to hear how each one had grown in these challenging times. With the usual circumstances and routines being replaced by new and unique situations – many of us were given an opportunity to develop different inner resources that were demanded.

During the time, another thing that was very apparent was the sense of support, love and guidance within the community that one could reach out to almost instantly :)

On 25th of Feb we had an evening of meditation with our dear Manoj. It was a deep experience of moving into one’s own inner stillness step by step, first through Dharana (Concentration) – first gathering one’s attention, Dhyana (Meditation) – establishing oneself in the space of silence and Samadhi – becoming the vast stillness itself.

We also had a lovely Q&A post the session with questions about stilling the mind and using different tools to anchor our attention.

If you missed the session, you can watch the recording here (passcode: 7FH+P4w$) and use it as a meditative experience to move into silence & stillness.
The year 2020 has been a year of resetting of the inner compass. The pandemic affected us in different ways and compelled us to evaluate our approach to life. For most people, this year has been transformative. In order to see what habits and thought patterns enable us to wake up excited, be enthusiastic throughout the day and make our experience of life exuberant, periodic writing or doodling is a tool to keep up with.

Have you ever felt lonely and distant from others? It may be that those close to you have different views on life, or maybe you argued with a friend. Often these differences can feel like something hard and permanent. This sense of separation can leave us feeling sad and unable to experience the joy and beauty in life.

Love is important because it has the power to overcome these differences. By opening us to the wider perspective pure love enables us to forget ourselves, our desires and our opinions.
Our problems shrink and instead all that is beautiful in life is enriched. We are able to see our deep connection with others, regardless of whether they agree with us or not.

If you allow this love to grow, your troubles will cease to be a problem. Love can widen your heart and mind, enabling the hardness of what separates you from others to melt away. Pure love brings a sweetness and joy through oneness – a perfect union with everyone and everything in the universe.
